belux twilight 360

Design John & Samantha Ritschl-Lassoudry

belux twilight 360 unites brilliant room and mood lighting in a clever way. While the indirect, powerful LED provides for a great deal of indirect room light, the luminaire body is brightened by additional light sources and thus provides for the typical twilight characteristic. New to the range are the Wireless Dim (WD) and Dim to Warm (DTW) versions. With Wireless Dim the belux twilight 360 can be controlled wirelessly via Smartphone, Tablet or radio switch using the free Casambi app.

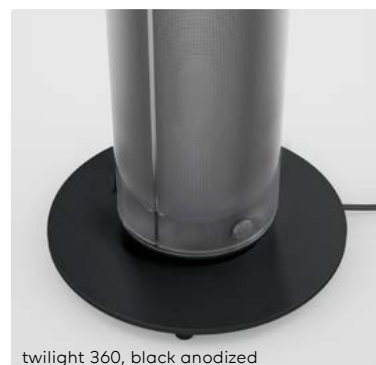

Dim to Warm utilises the natural understanding that light becomes warmer when dimmed. The newly introduced black surface, in combination with the black semi-transparent column specially tinted for belux, produces an extravagant ambience with a unique lighting mood

REMARKS

General: The direct and indirect light can be switched and dimmed separately

① AL: aluminium anodized,
BR: dark bronze anodized
SW: black powder coated

② Version Touchdim (TD): With cable-integrated switch housing for independent dimming of direct and indirect light.

③ Version DALI (DD): With two DALI addresses for direct and indirect light. Supports the DALI device type 6. Open cable end without plug.

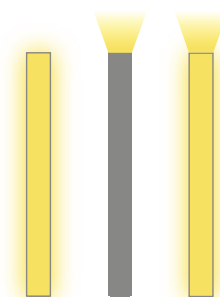

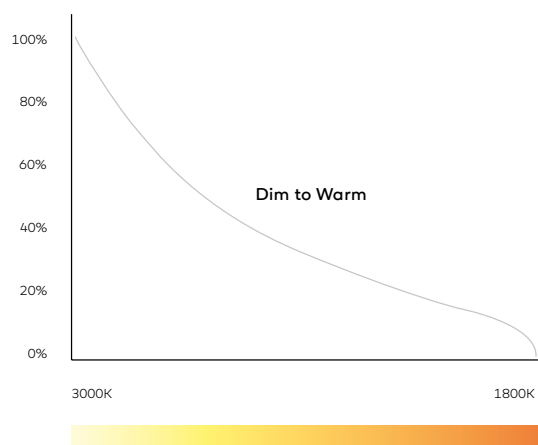

④ Wireless version (WD): Control via Casambi app or via wireless "Casambi Xpress Switch".

⑤ Version Dim to Warm (DTW): When dimming the lamp, the proportion of redness increases (see diagram)

⑥ Calculated values, measured data will be published soon at belux.com/twilight
